                    Radio Broadcasts

1. Attached are tape recordings of a typical 24-hour period of WSBURNT radio broadcasts, prepared for your use in analyzing radio style and program content. Since the originating office did not know what equipment would be available for playing back this sampling, they asked that stock tapes which were readily available be used.

2. The specifications are:

FIN-5835-003-3912  
Plastic recording (Magnetic) tape  
 $\frac{1}{4}$  inch x 1200 foot roll for  $7\frac{1}{2}$  inch per second capstand  
90 minute single track

3. The originating office would appreciate receiving further directives on radio program support which may be suggested as a result of your analysis of this material.
